Subject: RAI 15.B

Tom:

In response to RAI 15.B, in Section 2.7.2.3 the thickness of the upper confining zone within the MEA was revised from between 650 to 710 feet to 650 to 700 feet. All the other sections in the Technical Report that refer to the thickness of the upper confining zone have been revised accordingly and will be reflected in the final Technical Report.

Regards,

Larry Teahon
