

**SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION**

1. LICENSEE/LOCATION INSPECTED:  DCS Corporation 7400 Miller Drive Warren, Michigan 48092  REPORT NUMBER(S) 2015-001		2. NRC/REGIONAL OFFICE  Region III U. S. Nuclear Regulatory Commission 2443 Warrenville Road, Suite 210 Lisle, IL 60532-4352	
3. DOCKET NUMBER(S)  040-38362	4. LICENSE NUMBER(S)  SUB-1603	5. DATE(S) OF INSPECTION  02/17/2015	

**LICENSEE:**

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- ☒ 1. Based on the inspection findings, no violations were identified.
- ☐ 2. Previous violation(s) closed.
- ☐ 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

Non-cited violation(s) were discussed involving the following requirement(s):

- ☐ 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.  
(Violations and Corrective Actions)

**Statement of Corrective Actions**

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Main Office Inspection

Next Inspection Date: 02/17/2016

Field Office Inspection

Temporary Job Site Inspection

**PROGRAM SCOPE**

This was the third initial inspection of the licensee. The licensee had not received any licensed material yet; therefore, the next initial inspection must be completed before 2/18/2016. The licensee is prepared to conduct licensed activities. Licensed activities depend on the licensee getting a contract from the Department of Defense, and the licensee did not know when the contract will be awarded.

**PERFORMANCE OBSERVATIONS**

The inspectors: (1) observed that licensed material was not at the facility; (2) noted that the licensee was aware that it must notify the Region III Office within 30 days of receiving licensed material; (3) noted that the licensee had submitted an application for a license amendment (currently under review) to add a new individual to supervise the possession and storage of licensed material; (4) observed that the facility was as described in documents referenced in the license; (5) observed that the facility was equipped with security features as required; (6) observed that the licensee possessed an SE International Model Abacus radiation survey instrument; (7) noted that the licensee planned to conduct ambient exposure rate surveys upon receipt of licensed material; (8) noted that the licensee planned to have its survey instrument calibrated annually by an authorized firm; (9) noted that the licensee planned to use dosimeter badges for radiation workers; (10) observed that the licensee was prepared to secure licensed material as required; (11) observed that the licensee had posted its NRC license and NRC Form 3; (12) noted that the licensee knew about the requirement to conduct physical inventories of licensed material upon receipt and every 6 months thereafter; (13) noted that the licensee had no plans to terminate the license despite years of not receiving any licensed material; and (14) observed that the licensee's facility was equipped with fire detection and suppression systems.
