MEMORANDUM TO: Ronaldo V. Jenkins, Chief
Licensing Branch 3
Division of New Reactor Licensing
Office of New Reactors

FROM: Perry Buckberg, Senior Project Manager **/RAI/**
Licensing Branch 3
Division of New Reactor Licensing
Office of New Reactors

SUBJECT: SUMMARY OF FEBRUARY 18, 2015, PUBLIC MEETING WITH
DOMINION VIRGINIA POWER TO DISCUSS NORTH ANNA
COMBINED LICENSE APPLICATION REQUESTS FOR ADDITIONAL
INFORMATION AND OTHER EMERGENT TOPICS

On February 18, 2015, a Category 1 public conference call was held between the U.S. Nuclear Regulatory Commission (NRC) and Dominion Virginia Power (Dominion) regarding the North Anna Unit 3 Combined Operating License Application (COLA). The meeting notice was issued on February 5, 2015, and was available through both the NRC public meeting website and the Agencywide Documents Access and Management System (ADAMS) under ADAMS Accession Number ML15036A179. The list of meeting attendees is included as an enclosure.

On December 18, 2013, Dominion submitted a revised COLA that incorporated by reference the General Electric-Hitachi Economic Simplified Boiling-Water Reactor, Revision 9 that included all necessary information for the staff to conduct its review. The staff issued a review schedule for the revised COLA on April 7, 2014 (ML14079A174). The topic for discussion during this conference call was the applicant's January 19, 2015, response (ML15022A199) to the staff's Request for Additional Information (RAI) 7708, Question 2.4.2-15. The staff developed a set of storm water flow path/drainage sketches to discuss during the call (ML15044A083).

The meeting commenced at 2:00 p.m. with opening remarks, an introduction of attendees, an announcement of meeting logistics, and then the discussion of RAI 7708, Question 2.4.2-15. The staff referred to the sketches and described water drainage paths and possible flow restrictions. A Dominion representative countered by describing the grade for the flow path and offered that the flow, as described in the application, would not be restricted. The staff stated that information additional to the January 19, 2015, RAI response was needed consistent with the flow environment discussed during the meeting; specifically, to evaluate sheet flow depths from local intense precipitation along various pathways with respect to safety related openings along each selected flow path. Dominion agreed to revise the RAI response.

Following the technical discussion, members of the public were queried for related comments or questions. One member of the public provided recent news related to the site specific seismic environment. Another member of the public asked about the review schedule, and was provided information regarding the current phase of the safety review. Lastly, a member of the public asked about the acreage of the North Anna site and commented that the site was too small.

The meeting was then adjourned at 2:35 p.m.

Docket No.: 52-017

Enclosure:
List of Attendees
