| MATERIALS LICENSE Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 37, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below. | | | | | | | |
| Licensee | In accordance with the January 9, 2015, | | | | | | |
| 1. Peabody Midwest Mining, LLC | 3. License number 13-26785-01 is amended in its entirety to read as follows: | | | | | | |
| 2. 7100 Eagle Crest Blvd. | 4. Expiration date July 31, 2017 | | | | | | |
| Evansville, IN 47715 | 5. Docket No. 030-34405 Reference No. | 5 | | | | | |
| Byproduct, source, and/or special 7. Chemical and/or physical f nuclear material | | Maximum amount that licensee may possess at any one time under this license | | | | | |
| A. Californium-252 A. Sealed Source (A CVN.CY6 or From Model 100 Series Model MRC 2765 B. Cesium-137 B. Sealed Sources (Labs Model 225 Models CDC.704 | ntier Technology s or Monsanto 5) (Isotopes Products or Amersham 4 and CDC.705) | A. 9 sources not to exceed 108 millicuries total. Total activity 108 millicuries. B. 2 sources not to exceed 25 millicuries. Total activity 25 millicuries. | | | | | |
| CVN.5, CVN.6, C | CN2, CVN.CY6, CVN.7, CVN.10, Intier Technology | C. One analyzer, not to exceed 6 sources. Total activity 13.5 millicuries. | | | | | |
| 9. Authorized Use: | | | | | | | |
| A. and B. To be used in Gamma-Metrics Bulk Material Analyzer Model 2000 source holder for measurements of elemental analysis of coal and measurements of density/weight. C. To be used in Sabia Model XC-25 Series material analyzer for analysis of the chemical elemental composition of coal. <u>CONDITIONS</u> 10. A. Licensed material listed in Subitems 6.A and 6.B. shall be used at the licensee's facility located at Francisco Mine, County Road 850 East, Francisco, Indiana. | | | | | | | |

- 15. The licensee shall conduct a physical inventory every 6 months, or at other intervals approved by the U.S. Nuclear Regulatory Commission, to account for all sealed sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 5 years from the date of each inventory, and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.
- 16. A. Each gauge shall be tested for the proper operation of the on-off mechanism (shutter) and indicator, if any, at intervals not to exceed 6 months or at such longer intervals as specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission pursuant to 10 CFR 32.210 or the equivalent regulations of an Agreement State.
 - B. Notwithstanding the periodic on-off mechanism (shutter) and indicator test, the requirement does not apply to gauges that are stored, not being used, and have the shutter lock mechanism in a locked position. The gauges exempted from this periodic test shall be tested before use.
- 17. The following services shall not be performed by the licensee: installation, initial radiation surveys, relocation, removal from service, dismantling, alignment, replacement, disposal of the sealed source and non-routine maintenance or repair of components related to the radiological safety of the gauge (i.e., the sealed source, the source holder, source drive mechanism, on-off mechanism (shutter), shutter control, shielding). These services shall be performed only by persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.
- 18 A. The licensee may maintain, repair, or replace device components that are not related to the radiological safety of the device containing byproduct material and that do not result in the potential for any portion of the body to come into contact with the primary beam or in increased radiation levels in accessible areas.
 - B. The licensee may not maintain, repair, or replace any of the following device components: the sealed source, the source holder, source drive mechanism, on-off mechanism (shutter), shutter control, or shielding, or any other component related to the radiological safety of the device, except as provided otherwise by specific condition of this license.
- 19. Prior to initial use and after installation, relocation, dismantling, alignment, or any other activity involving the source or removal of the shielding, the licensee shall assure that a radiological survey is performed to determine radiation levels in accessible areas around, above, and below the gauge with the shutter open. This survey shall be performed only by persons authorized to perform such services by the U.S. Nuclear Regulatory Commission or an Agreement State.
- 20. The licensee shall operate each device containing licensed material within the manufacturer's specified temperature and environmental limits such that the shielding and shutter mechanism of the source holder are not compromised.

| | | | | | | | | |
| 21. | The licensee shall assure that the shutter mechanism of each device is locked in the closed position during periods when a portion of an individual's body may be subject to the direct radiation beam. The licensee shall review and modify, as appropriate, its "lock-out" procedures whenever a new device is obtained to incorporate the device manufacturer's recommendations. | | | | | | | |
| 22. | 2. Except for maintaining labeling as required by 10 CFR Part 20, or 71, the licensee shall obtain authorization from the U.S. Nuclear Regulatory Commission before making any changes in the sealed source, device or source-device combination that would alter the description or specifications as indicated in the respective certificate of registration issued either by the Commission pursuant to 10 CFR 32.210 or by an Agreement State. | | | | | | | |
| 23. | | authorized to transpo and Transportation of | | | ovisions of 10 CFR Part | | | |
| 24. | 4. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations. | | | | | | | |
