2) Letter from P. W. Smith (DTE Electric) to USNRC, "Request to Amend the
Fermi Site Indemnity Agreement No. B-20," NRC3-15-0001, dated February
13, 2015

Subject: Request to Amend the Fermi Site Indemnity Agreement No. B-20

In Reference 2, DTE Electric Company (DTE) requested that the NRC amend Indemnity Agreement No. B-20 to incorporate changes in the Fermi site description to include the location of the proposed Fermi 3 nuclear reactor. During the review of the proposed changes, the NRC requested that DTE provide a copy of a letter from American Nuclear Insurers (ANI) confirming their intent to revise the Fermi site insurance policy and certificate.

The attachment to this letter provides the letter requested by the NRC. The amended policy will include the proposed Fermi 3 construction site, have a limit of liability of \$375 million and provide primary financial protection as required under Section 170 of the Atomic Energy Act of 1954, as amended.

Re: DTE Electric Company
Enrico Fermi Unit III
Facility Form Policy No. NF-0092 and Worker Certificate No. NW-0526

Dear Mr. Olson,

This letter confirms that American Nuclear Insurers will amend the site descriptions under the captioned policy and certificate to include the area where the Enrico Fermi Unit III is proposed to be built. The amended site description will read as follows:

Location: All of the premises including the land and all buildings and structures of DTE Electric Company's Enrico Fermi Units I, II and III located in Lagoona Beach, Frenchtown Township, Monroe County, Michigan described as follows and as illustrated in the attached diagram:

"Commencing at the intersection of coordinate points N-6000 and E-6000, thence in an easterly direction to point 1, thence in a northerly direction to point 2, thence in a westerly direction to point 3, thence in a straight line to the southeastern point of the Fermi II security fence, thence along the Fermi II security fence in a northerly, westerly, and southerly direction to the southwestern point of the Fermi II security fence, thence in a straight line in a southerly direction to point 4, thence in a straight line in an easterly direction to point 5, thence in a southerly direction to point 6, thence in an easterly direction to point 7, thence in a straight line to coordinate point N-6000 and E-6000. Additionally, the site will include the two Fermi II cooling towers, the Fermi II circulating water pump house, the Fermi III cooling tower, and all connecting piping, etc."

The effective date of the amended site descriptions will be concurrent with the date of the NRC's license amendment and amended indemnity agreement.

This commitment to amend the site descriptions to include Enrico Fermi Unit III remains valid thru September 1, 2015. In the event the license amendment and issuance of the amended indemnity agreement occurs after this date, ANI will review the existing circumstances prior to reinstating our commitment to do so.

Please do not hesitate to contact me should you have any questions.

Regards,
