DOMINION NUCLEAR CONNECTICUT, INC
MILLSTONE POWER STATION UNITS 2 AND 3
FLOOD HAZARD REEVALUTION REPORT IN RESPONSE
TO MARCH 12, 2012 INFORMATION REQUEST REGARDING FLOODING ASPECTS OF
RECOMMENDATION 2.1

On March 12, 2012, the Nuclear Regulatory Commission (NRC) issued, "Request for Information Pursuant to Title 10 of the Code of Federal Regulations 50.54(f) Regarding Recommendations 2.1, 2.3, and 9.3, of the Near-Term Task Force Review of Insights from the Fukushima Dai-ichi Accident," to all power reactor licensees and holders of construction permits in active or deferred status. Flooding Recommendation 2.1 requires licensees to perform a flood hazard reevaluation and provide a final report documenting the results, as well as pertinent site information and detailed analysis.

For Flooding Recommendation 2.1, Enclosure 2 of the letter states that in accordance with the NRC's prioritization plan, within 1-3 years from the date of the information request, submit the Hazard Reevaluation Report and include the interim action plan. In a letter dated May 11, 2012, the NRC issued their prioritization plan. The response date for Millstone Power Station (MPS) Units 2 and 3 flood hazard reevaluation was identified as March 12, 2015, which corresponds to [REDACTED] three years from the date of the March 12, 2012 Information Request.

Attachment 1 provides the MPS Flooding Hazard Reevaluation Report. The report is being provided to the Document Control Desk in hard-copy form and to the other letter recipients by electronic form on a compact disc. Attachment 2 provides the MPS interim actions.
