Dear Mr. Berkley:

This is in reference to your letter dated January 27, 2015 requesting to amend Nuclear Regulatory Commission License No. 47-09772-02. In order to continue our review, we need the following additional information:

1. Your application should have been signed by a management representative rather than you. Please submit a letter signed by a management representative indicating that management has reviewed the application and concurs in the statements and representations contained therein. Note also that a management representative should sign all future correspondence that requests a change in your license.

2. In support of your request to authorize Dr. Guan for use of the Cesium-137 calibrator for survey meter checks, please provide one of the following, as applicable:

   a. Previous license number (if issued by NRC) or a copy of the license (if issued by an Agreement State) on which Dr, Guan was specifically named as an authorized user for the uses requested; or

   b. Documentation and description of the training and experience demonstrating that the proposed user is qualified by training and experience for the use requested.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses;** then **Licensee Toolkits, see our toolkit index page.** You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

We will continue our review upon receipt of this information. Please reply to my attention at the Region I Office and refer to Mail Control No. 586034. If you have any technical questions regarding this deficiency letter, please call me at (610) 337-5358.

If we do not receive a reply from you within 30 calendar days from the date of this letter, we will assume that you do not wish to pursue your application.

Sincerely,
