Subject: Additional Information for March 24, 2015 Meeting between the NRC and the Army on the Davy Crockett License (SUC-1593)

Representative Evans,

I appreciate your patience. Here is the remaining information for the March 24, 2015 meeting between the Army and the NRC on the Davy Crockett License:

Draft Documents from Army Regarding March 24, 2015 Meeting on Depleted Uranium from the Davy Crockett Weapon System.

ML15078A092 DRAFT National Environmental Policy Act (NEPA) document
ML15078A099 DRAFT Decommissioning Funding Plan
ML15078A114 DRAFT Programmatic Approach for Preparation of Site-Specific Environmental Radiation Monitoring Plans
ML15078A115 DRAFT Proposed Amendments to Conditions of NRC SML # SUC-1593
ML15078A118 DRAFT "Radiation Safety Plan for IMCOM Ranges Affected by M101 Davy Crockett Spotting Round Depleted Uranium."

These documents are located in package No. ML15078A094 (which I provided to you yesterday). The package No. is not declared- so please use the individual ML numbers provided above. They are now publicly available. The Army said that they will have one more draft document by Monday, March 23. The NRC staff may not have enough time to review this draft so the NRC staff may not be able to have a detailed discussion on documents received late- in which case we may be in the listening mode. I will try to get the draft document that is expected by Monday, March 23 in the our records system before the meeting. If not, I may be able to provide a pdf file.
