PART I.C COMMENTS (Continued)

Please note that NRC used to perform its own radiation monitoring around nuclear power plants, and published NUREG-0837, VOL 1 (1981) to VOL 17 (1997). Radiation monitoring data on nuclear power plants within the two requested counties may be found in these reports. While these reports are publicly available, they predate ADAMS and are maintained on microfiche in the PDR. You may contact the PDR staff to request these documents. PDR staff advises that a contractor will make copies for a fee (usually \$.65 per page for conversion from microfiche to PDR), and email them to you. Or, you may come to the PDR and make your own copies for free. If you choose this option, please contact the PDR to schedule an appointment. The "microform address" and accession number for each quarterly radiation monitoring network progress report that NRC maintains on microfiche is as follows:

Please note that California is an "Agreement State." Agreement States have entered into agreements with NRC that give them the authority to license and inspect byproduct, source, or special nuclear materials used or possessed within their borders. As such, they have radiation measurement data you may be interested in. You may wish to contact Mr. Gonzalo Perez, Branch Chief, Radiologic Health Branch, Division of Food, Drug & Radiation Safety, CA Dept. of Health Services, P.O. Box 997414, MS 7610, 1500 Capitol Avenue, Sacramento, CA 95899-7414, or gonzalo.perez@cdph.ca.gov, or (916) 440-7942 to learn how you can request radiation monitoring data his office maintains.
