Dear Mr. Taxler:

As discussed in a letter dated February 23, 2015, (Agencywide Document Access and Management System Accession No. ML15054A325), the Nuclear Regulatory Commission (NRC) staff planned to perform an inspection of Tindall Corporation to review implementation of your quality assurance program in accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) Part 50, Appendix B and 10 CFR Part 21 as they pertained to Fort Calhoun Nuclear Power Station's precast structural concrete columns. The letter discussed a preliminary schedule for the inspection. The inspectors planned to arrive at your facility in Fairforest, SC on Monday, March 2, 2015, and conduct the inspection through Friday, March 6, 2015. However, on February 28, 2015, the NRC informed you by phone that this inspection has been postponed until a later date based on changes to your testing and manufacturing schedule. The new inspection dates will be announced in a subsequent letter. The lead inspector for this effort is Ms. Aixa Belen; you may contact her at 301-415-6263 or via electronic mail at [Aixa.Belen@nrc.gov](mailto:Aixa.Belen@nrc.gov).
