Regulatory Assurance Manager
Waterford 3

W3F1-2015-0023

March 10, 2015

U.S. Nuclear Regulatory Commission
Attn: Document Control Desk
Washington, DC 20555-0001

Subject: Resubmittal of Technical Requirements Manual Update to the NRC
Waterford Steam Electric Station, Unit 3 (Waterford 3)
Docket No. 50-382
License No. NPF-38

Reference: 1. Entergy letter W3F1-2014-0078 Technical Requirements Manual Update to
the NRC, dated December 23, 2014

Dear Sir or Madam:

In Reference 1 Waterford submitted an electronic copy of the Technical Requirements Manual (TRM) to the NRC to satisfy the submittal frequency required by TS. 6.16, which indicates that the TRM will be submitted at a frequency consistent with 10 CFR 50.71(e). The files contained in the submittal did not meet the Document Control Desk's standard for electronic submittals. The NRC requested that the files be corrected and resubmitted. This submittal satisfies that request. This update supersedes any past submittals of the Technical Requirements Manual.

There are no commitments associated with this submittal. Should you have any questions or comments concerning this submittal, please contact the Regulatory Assurance Manager, John Jarrell, at (504) 739-6685.

Sincerely,

John Jarrell
Reg. Assurance Manager
