SUBJECT

C/N 583860

SUMMARY

I contacted Mr. Maddock to propose that Niowave's application for a new license be voided due to lack of sufficient detail.

I informed him that we have been asking for a considerable amount of additional technical information than what appears in NUREG-1556, volume 21. I proposed that the current C/N 583860 be voided and that I would e-mail him additional information that he should provide/address in a resubmitted application.

Mr. Maddock agreed, and asked about the application fee. I told him that the fee that he paid for the initial application would be applied to the resubmittal. Niowave will not have to pay an additional application fee.

ACTION REQUIRED

Void C/N 583860, and e-mail Mr. Maddock a description of additional information that Niowave should address in a resubmitted application for a new cyclotron production license.
