The purpose of the meeting was to discuss the portion of the FHR that the USACE is performing under contract to the NRC for Farley. By letter dated September 26, 2013 (ADAMS Accession No. ML13274A343), SNC requested NRC assistance in having the USACE perform a dam failure analysis to support SNC's development of an FHR in response to the March 12, 2012, request for information (ADAMS Accession No. ML12073A348).

The USACE and NRC provided SNC with the preliminary results of the USACE dam failure analysis. SNC presented the analysis of the watershed it has completed to the NRC and USACE. The NRC and USACE requested that SNC provide the information that it had developed related to topography near the Farley site. The licensee provided that information to the NRC by letter dated March 13, 2015 (ADAMS Accession No. ML15084A588).

The NRC stated that the next action to be completed in the process is the transmittal of the final results to SNC. The NRC also stated that SNC could request another meeting with the NRC after receiving the results.

The USACE was provided an opportunity to comment on this summary prior to its issuance and their comments were addressed in the final version of this summary.
