Figure 2.5-3 – Tectonic Provinces Map

ARCHEAN AND PALEOPROTEROZOIC GEOLOGIC PROVINCES

LATE PROTEROZOIC AND MESOPROTEROZOIC GEOLOGIC PROVINCES

LEGEND

- CPO — CENTRAL PLAINS OROGEN (INCLUDES YAVAPAI AND MAZATZAL PROVINCES)
- SPI — SUPERIOR PROVINCE
- MRV — MINNESOTA RIVER PROVINCE
- PO — PENOKEAN OROGEN (INCLUDES PEMBRINE-WAUSAU AND MARSHFIELD TERRANES)
- MCR — MIDCONTINENT RIFT
- SGR — SOUTHERN GRANITE RHYOLITE PROVINCE
- EGR — EASTERN GRANITE RHYOLITE PROVINCE
- RQ — RHYOLITE-QUARTZ ARENITE BELT

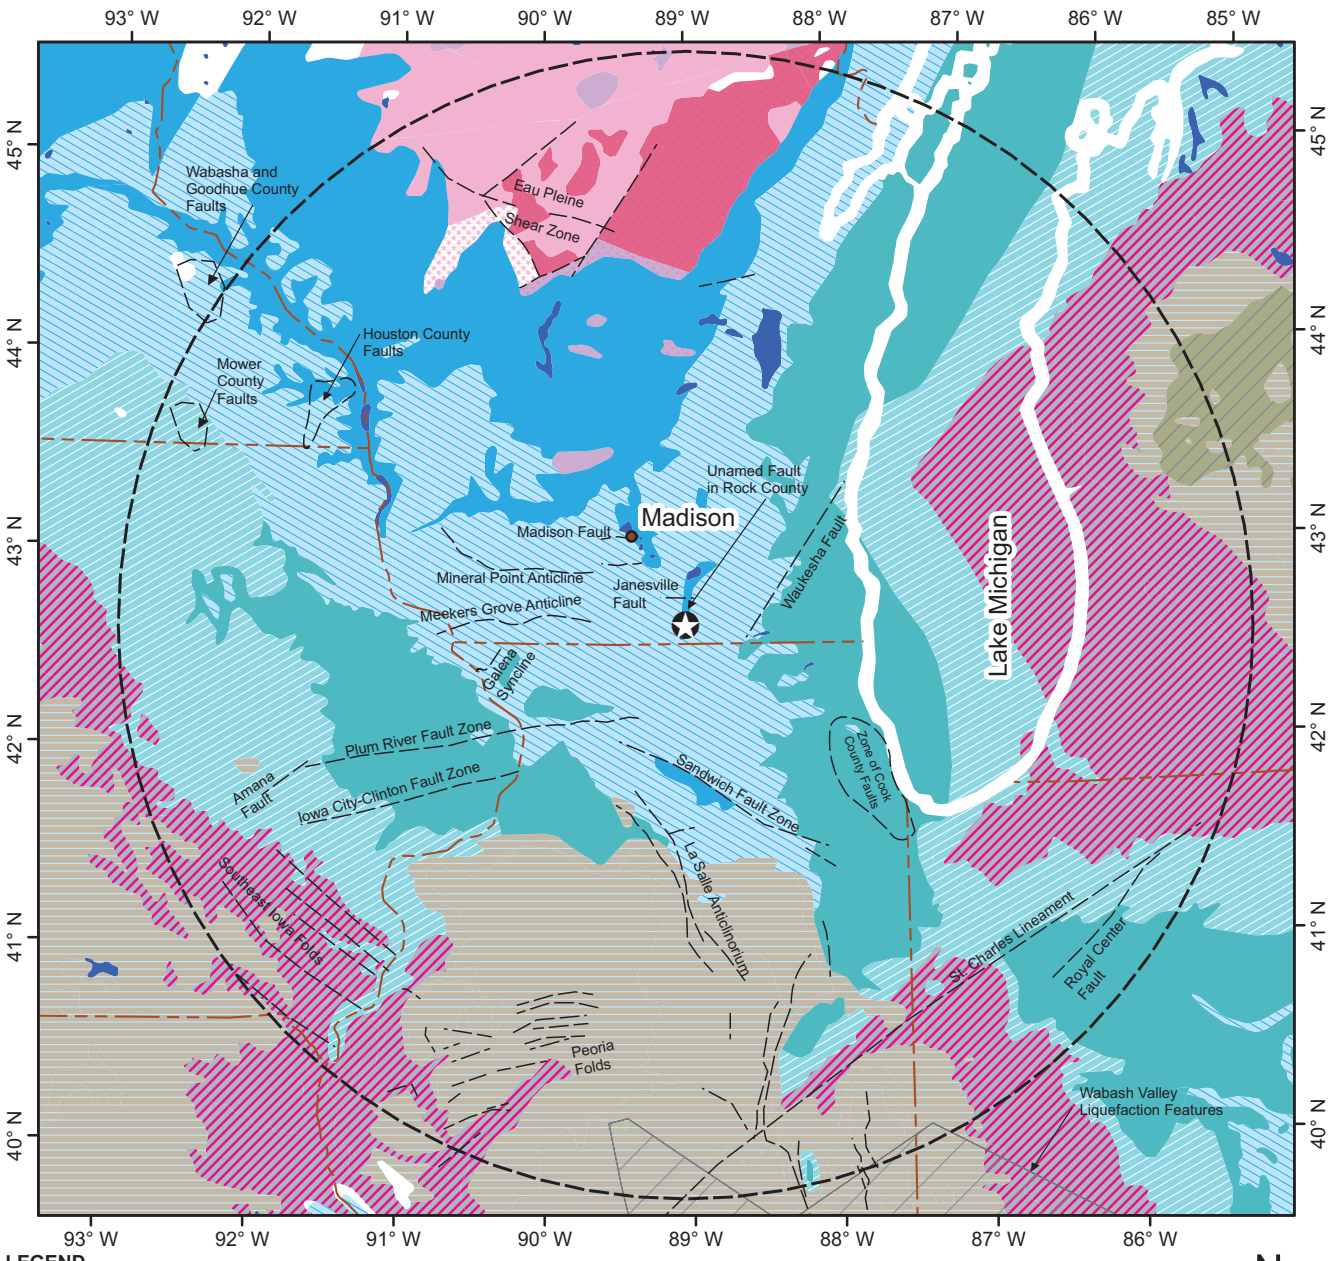

- STRATIGRAPHIC CONTACT (DASHED WHERE APPROXIMATED)
- HIGH-ANGLE FAULT
- STRIKE-SLIP FAULT PREDOMINANT RELATIVE DISPLACEMENT
- THRUST FAULT

LEGEND

- SHINE SITE
- 200 Mile (322 KM) Radius
- State Boundary
- Fault and Fold Trend
- Open Water

Geologic Time	Generalized Geologic Units	
Jurassic	Mudstone, shale	
Pennsylvanian	Coal, limestone, sandstone, shale or clay shale	
Mississippian	Limestone, shale or clay shale	
Devonian	Carbonate, sandstone	
Silurian	Dolomite, silty limestone	
Ordovician	Conglomerate, dolomite, limestone, sandstone, shale	
Cambrian	Dolomite, sandstone, shale	
Early Proterozoic	Quartzite	Wolf River Batholith
Early Proterozoic	Felsic Rocks	Wolf River Batholith
Early Proterozoic	Volcanic Rocks	Wolf River Batholith
Early and Middle Proterozoic	Granitic Rocks	Wolf River Batholith
Late Archean	Orthogneiss

Figure 2.5-6 – Regional Magnetic Anomaly Map and Structural Interpretation

LEGEND

SHINE SITE

MCR MIDCONTINENT RIFT

200 MILE (322 KM) RADIUS

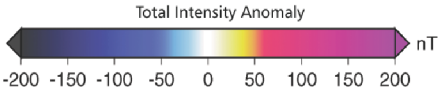

HIGH-ANGLE FAULT - CHIEFLY TRANSCURRENT SHEARS AND FAULTS OF LATE PALEOPROTEROZOIC - MESOPROTERZOIC AGE, BUT INCLUDES FAULTS OF LATE ARCHEAN AGE IN NORTHERN MIDCONTINENT. ARROWS INDICATE RELATIVE DISPLACEMENT WHERE KNOWN. SOLID LINE, BASED CHIEFLY ON GEOLOGIC DATA; DASHED LINE, BASED CHIEFLY ON MAGNETIC DATA. NOTE: SAME DISTINCTION APPLIES TO STRUCTURES FOLLOWING:

DUCTILE SHEAR ZONE; MAINLY OF LATE PALEOPROTEROZOIC AGE

BOUNDARY OF MAJOR RIFT ZONE OF LATE MESOPROTEROZOIC (MIDCONTINENT RIFT) AND CAMBRIAN (REELFOOT RIFT) AGE

THRUST FAULT OF MESOPROTEROZOIC (~1.1 Ga) AGE

THRUST FAULT OF PALEOPROTEROZOIC AGE ASSOCIATED WITH SUTURE ZONES. SOLID LINE, BASED CHIEFLY ON GEOLOGIC DATA; DASHED LINE BASED CHIEFLY ON MAGNETIC DATA.
