General Comment

The plan to shut down the Emergency Planning Zone and Emergency Response Data System around Vermont Yankee is completely crazy! There are million curies of radioactivity sitting seven stories above the reactor with less security staff in a world of terrorism and with a company, Entergy, that hasn't been honest about the structural integrity and failings of the aging facilities. I live just outside that ten mile zone, but know many who live inside that zone. Even though I am outside that zone, having that zone still offers me awareness and alert should something happen at the plant. All of us deserve ongoing care and concern and protection until that fuel is gone and the reactor completely decommissioned. DO NOT SHUT DOWN THE EMERGENCY PREPAREDNESS SYSTEM THAT IS IN PLACE!
