Re: Request for Extension of Public Comment Period on Draft NUREG-2126, Standard Review Plan for Conventional Uranium Mills and Heap Leach Facilities (79 Fed. Reg. 75597) Docket ID NRC-2014-0178

Dear Mr. Mandeville:

On December 18, 2014 the U.S. Nuclear Regulatory Commission (NRC) released Draft NUREG-2126 for public review and comment. Due to the number of other issues the agency is working on and the fact Utah has the only operating conventional mill in the country, the Utah Division of Radiation Control (UDRC) requests an extension of the comment period.

In addition to the conventional mill, Utah has a number of uranium facilities in Utah that this draft NUREG will impact. The DRC intends to submit comments on the draft NUREG but more time is needed to analyze the guidance document.

The DRC hereby requests a 60-day extension of the existing comment period in order to adequately respond to the draft NUREG. Thank you for your consideration of this request. If you have any questions or need additional information, please contact me at [rlundberg@utah.gov](mailto:rlundberg@utah.gov) or (801)536-4250.

Sincerely,

*Rusty Lundberg*  
Rusty Lundberg, Director  
Division of Radiation Control
