1. The NRC formulas in section 10 CFR 50.75(c) include only those decommissioning costs incurred by licensees to remove a facility or site safely from service, and reduce residual radioactivity to levels that permit: (1) release of the property for unrestricted use and termination of the license; or (2) release of the property under restricted conditions and termination of the license.
  2. By Order dated October 10, 2008 in PUCT Docket No. 35772, NRG South Texas LP was granted approval to establish a separate spent fuel management subaccount. By Order dated July 13, 2009 in PUCT Docket No. 36796, NRG South Texas LP was granted approval to establish a separate subaccount for pre-shutdown disposal of large components. The amounts allocable to the spent fuel management and pre-shutdown disposal subaccounts are not included in the reported amount. The reported amount includes funds accumulated based upon a site-specific study that includes license termination and other costs.
  3. Target amounts to be collected were established by the PUCT-approved separate non-bypassable decommissioning charges established in PUCT Tariff Control No. 41970. Actual collections will vary but the charges are intended to produce the targeted annual collection amounts established in PUCT Docket No. 41580. All current collections are being deposited in the large component disposal subaccount.
