LISLE, IL 60532-4352

APR 08 2015

Melinda Caron
Radiation Safety Officer
DCS Corporation
7400 Miller Drive
Warren, Michigan 48092

Dear Ms. Caron:

Enclosed is Amendment No. 3 amending your NRC Material License No. SUB-1603 in accordance with your requests, with the exception of adding Brian Seile as an Authorized User. As we discussed on February 24, 2015, Mr. Seile must complete training and experience prior to being listed on the license.

Please also note that, also as discussed in our February 24, 2015, phone conversation, and confirmed in your March 5, 2015, letter, we have amended your license to reflect your current "possession and storage only" radioactive materials use status. As indicated in our phone conversations and on the license, **no radioactive material may be used or received under the license without an amendment.** The expiration date has also been revised, in accordance with decommissioning requirements specified in Title 10 of the *Code of Federal Regulations* Section 30.36(d).

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

M. Caron

In accordance with Title 10 of the *Code of Federal Regulations* Section 2.390, a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

A handwritten signature in black ink that reads "Sara A. Forster". The signature is written in a cursive style with a large initial 'S' and 'F'.
