SNM-164
070-00190

Dear Mr. Haleem,

This is in reference to your letter dated March 25, 2015, requesting for amendment to Nuclear Regulatory Commission License (NRC) No. 08-02075-03, Docket No. 03000638. In order to continue our review, we need the following additional information:

1. You have requested for additional amounts of material on your license which requires financial assurance. 10 CFR 30.38 states, "Applications for amendment of a license must be filed in accordance with 10 CFR 30.32..." 10 CFR 30.32(h) states that the application must contain a proposed decommissioning funding plan. You currently have a decommissioning funding plan with us, however with this amendment, the Certification of Financial Assurance dated July 2, 2007, would not be correct. Please amend and submit a new Certification of Financial Assurance with the new amounts of material. Since your decommissioning funding plan supports this license as well as License No. SUD-157, Docket No. 04006329, and License No. SNM-164, Docket No. 07000190, a financial assurance action will be opened for these three licenses.
2. You have requested to be licensed for cesium-134 with barium-134. It is unclear why you have requested for barium-134 as it is a stable isotope. Barium-134 will not be listed on the license unless you provide additional information why it should be included.
3. You have requested for several sealed sources to be removed from the license. Please submit the latest leak test on the sources that required leak testing, or a statement why leak testing was no longer required for items 6.BB., 6.HH., 6.II., 6.JJ., and 6.MM of the sources that you documented as being transferred or disposed in your letter. Additionally state that you possessed no other sealed sources under these authorizations than the ones that you documented in your letter as having been transferred or disposed.

We will continue our review upon receipt of this information. Please reply to my attention at the Region 1 Office (Address below) and refer to Mail Control No. 586435. If you have technical questions regarding this letter, please call me at (610) 337-5366.

Please note that you may not reply to this letter by return e-mail. Your reply must be in writing by letter, facsimile (610-337-5269), or signed letter attached to an email. If we do not receive a reply from you within 30 calendar days from the date of this e-mail, we will assume that you do not wish to pursue your application.

Region 1 Office Mailing Address: Licensing Assistance Team, US Nuclear Regulatory Commission Region I, 2100 Renaissance Boulevard, Suite 100, King of Prussia, PA 19406-2713.
