General Comment

FPL should be denied a license for Turkey Point expansion for many reasons:

1. Too expensive. Nuclear power is much more expensive than solar
2. Too dangerous. We don't want Fukushima here in Miami.
3. Bad Deal. Nuclear Cost Recovery law makes ratepayers bear the cost and risk while FPL reaps profit
4. Sea level rise will make Turkey Point an island
5. No need. Miami's demand for electricity is falling, not rising.
6. Conservation first. Miami could conserve much more than it does.

Most important: Distributed rooftop solar should be top priority for electricity generation. It's cheap, clean, safe, efficient, reliable, and resilient in disasters. No excuse not to make the sunshine state generate all it's power from the sun. All that's needed is efficient energy storage.
