Name: Julio Roque

General Comment

I would like to express my concerns and opposition to this projects on environmental and quality-of-live grounds. First, we only need to look at the Fukushima incident in Japan, a country I lived for over 5 years, to understand the catastrophic potential of this project in Hurricane prone Florida. Second, the infrastructure necessary to support this project, including power cables traversing some of the best communities in South Florida, will lower property values and increase health concerns for our families.

Please, either reject this project or require FPL to propose a better proposal to safeguard our health and quality of live.

Regards,

Julio Roque
