

Dear Regulators -

Please do your job.

Pilgrim puts our lives at risk. This nuclear plant is the same model as the one in Japan. Pilgrim is 47 years old. Should there be a super storm like Sandy, <sup>the</sup> fuel rods are not safe in wet storage. Do something!

Alexandra  
Gralze

**CLOSE PILGRIM NOW**

Because

**SWIMMING EAST**  
is NOT an evacuation  
possibility during a blizzard!
