

April 21, 2015

Mr. Ralph Butler, Executive Director
University of Missouri Research Reactor
1513 Research Park Drive
Columbia, MO 65211

Dear Mr. Butler:

Thank you for contributing to the success of the U.S. Nuclear Regulatory Commission's 26th Annual Regulatory Information Conference (RIC) on March 12, 2015, at the Bethesda North Marriott Hotel and Conference Center in Rockville, Maryland. Your presentation, "Research Reactors Enable Scientific and Technological Innovation," was informative, engaging, and a wonderful stimulus for audience questions and panel discussions. Our session on "Unique Aspects of Regulating Research and Test Reactors" (T-37) had over 95 attendees and audience feedback was overwhelmingly positive. Also, thank you for providing answers to questions that were not addressed during the technical session. Responses to unanswered questions will be posted the RIC Web site at <http://www.nrc.gov/public-involve/conference-symposia/ric/>.

This year the number of participants at the RIC reached nearly 2,800 with international representation from approximately 34 countries. The feedback received indicates that the RIC was successful in achieving its goal of providing an opportunity for participants to interact with colleagues and to gain and share valuable insights, opinions, and information on nuclear regulatory activities. Audio and video recordings are now available for the opening session, the Commission plenary sessions, the session "Implementation of Lessons Learned from the Fukushima Dai-chi Accident," and the session "Regulatory Agility in the New Millennium." Thank you again for being part of a successful RIC.

Sincerely,

/RA/

Mirela Gavrilas, Deputy Director
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation
