

**INSPECTION RECOMMENDATIONS:
CHANGES MADE AT THE WESTINGHOUSE
COLUMBIA FUEL FABRICATION FACILITY DURING 2014**

By letter dated January 23, 2015, the Westinghouse Electric Company, LLC, (Westinghouse) submitted the annual report of the changes that had been made to the Columbia Fuel Fabrication Facility (CFFF). The staff at the U.S. Nuclear Regulatory Commission (NRC) Headquarters reviewed each change documented in the facility change report (Ref. 1). The submittal documents 588 records of changes that were made without prior NRC approval in accordance with Title 10 of the *Code of Federal Regulations* (10 CFR) Section 70.72. The NRC staff agrees with Westinghouse that all such changes are in accordance with 10 CFR 70.72. Therefore, no prior NRC approval was needed for any of the changes.

Nonetheless, the Headquarters staff identified changes that Region II staff may want to review during an inspection at the CFFF. The recommendations do not imply a safety concern; instead, the recommendations are intended to provide additional assurance, to that provided by the established procedures of Westinghouse, that the changes were implemented correctly. The configuration change form numbers (CCF) and the page references pertain to the submitted facility change report (Ref. 1).
