NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE RD. SUITE 210
LISLE, IL 60532-4352

APR 13 2015

Alvis E. Foster, Ph.D.
Radiation Safety Officer
Indiana University Health Ball Memorial Hospital, Inc.
2401 W. University Avenue
Muncie, IN 47303

Dear Dr. Foster:

It has come to our attention that Amendment No. 101 to your NRC Material License No. 13-00951-03 issued on December 15, 2014, contained an error.

Specifically, the authorization for Dr. Yunjie Xie Lin was inadvertently changed in Amendment 98 to limit the authorization for 10 CFR 35.300 to the oral administration of sodium iodide I-131 in quantities less than or equal to 33 millicuries only. As discussed with you by telephone on April 13, 2015, you requested to correct the authorization for Dr. Lin in accordance with the authorization listed in Amendment No. 97 dated August 6, 2013. This error has been corrected in the enclosed Corrected Copy of License Amendment No. 101. We apologize for any inconvenience this may have caused you.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

A.E. Foster
