<b>Operating Test Item</b>	<b>Comment</b>	<b>Comment Resolution</b>
Admin JPM OT-3701-ADM_001_RO	Need to ensure that this JPM is for RO level!	This is an RO level JPM. There is also a panel manipulation for this.
Admin JPM OT-3701-ADM_028_RO	Need to ensure that this JPM is for RO level!	This is an RO level JPM.
Admin RP JPM OT-3701-ADM_002_RO	Need to ensure that this JPM is for RO level!	This is an RO level JPM.
Admin SRO JPM OT-3701-ADM_006SRO	Need to ensure that this JPM is for SRO level! (Same JPM done by RO's!)	This is same JPM done by both RO and SRO applicants, but SRO must do Tech Spec portion that RO does not do.
Control Room JPM OT-3701-C51_501 Withdraw SRMs	Need to explain Type Codes B and C!	"b" will be changed to a "D" and "C" will be changed to "S."
In-Plant JPMs	Why are RO and SRO(I & U) in-plant JPM's different?	Mistake by author. SRO ES-301-2 (U & I) sheets will be replaced.
Scenario 3, Event 5, D-1 sheet gives component failure credit to BOP. (301-5 sheet is correct.)	Why is the BOP credited for a component failure for this? What actions must he take on the panel and to diagnose and to respond to alarms?	No actions other than responding to annunciator alarm. Will not count as credit towards event for BOP. Will erase "C(BOP)" from D-1 sheet.
Scenario 4, Events 3 & 4.	Need to have operator actions that include diagnosis and panel actions for the BOP to get credit for performing these events.	Event 3 has no panel actions for BOP. Will erase "C(BOP)" from D-1 sheet. ATC has actions for Event 4. No change for ATC.
Scenario 4, Events 3 & 8.	D-1 sheet does not have Tech Spec calls annotated.	Events 3 & 8 will include Tech Specs in Event Description column.
ES 401-1 Sheet SRO-Only Points	Tier 1 Group 2 SRO count should be 2 for G and 1 for A2.	401-1 cover sheet will be corrected.
Audit Scenario 2 and Exam Scenario 1	Major event and post-trip component failure appear similar for both exams.	Exam author will change either NRC exam or Audit exam to ensure no duplication.
