Subject: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287
Proposed Revision to Technical Specifications
Pressure-Temperature Operating Curves
Technical Specification Change No. 98-06

In a letter dated October 15, 1998, Duke Energy Corporation (Duke) requested a revision to the Technical Specifications for Oconee Nuclear Station Units 1, 2, and 3. The amendment consisted of proposed changes to the pressure-temperature operating curves and associated changes to the Low Temperature Overpressure Protection (LTOP) limits. In a letter dated November 19, 1998, the NRC requested additional information (RAI) about LTOP setpoints addressed in the Technical Specification amendment request. On December 17, 1998, Duke provided responses to questions one through six of the NRC's November 19, 1998, RAI. Duke's response to the seventh question was deferred pending NRC resolution of issues related to the location and content of the requested information in Technical Specifications. Resolution of the issues associated with question seven were resolved in a discussion between Messrs. LM Olshan (NRC), C Liang (NRC) and RC Douglas (Duke) on January 11, 1999.

The enclosure provides Duke's response for question seven of the request for additional information.

If there any questions regarding this submittal, please contact Robert Douglas at 864-885-3073.

Very truly yours,

W. R. McCollum, Jr.
Oconee Site Vice President
