Selected Licensee Commitments Manual (SLC)

Gentlemen:

Pursuant to 10CFR 50.4 and 50.71, please find attached 7 copies of the latest revisions to the Oconee Selected Licensee Commitments Manual (SLC). The SLC Manual is Chapter 16.0 of the Oconee Updated Final Safety Analysis Report (UFSAR). This manual is intended to contain commitments and other station issues that warrant higher control, but are not appropriate for inclusion into the Technical Specifications (TS). Instead of being updated with the annual UFSAR Update, the SLC Manual will be updated as necessary throughout the year.

Very truly yours,

W. R. McCollum, Jr.
Vice President
Oconee Nuclear Station

Subject: Oconee Selected Licensee Commitments Manual (SLC)
Revision

On June 23, 1999, Station Management approved revision to SLC 16.7.13 to be implemented on June 29, 1999. This revision to SLC 16.7.13 replaces the function for SSF ASW pump discharge pressure instrumentation with a function for SSF ASW pump flow instrumentation. Since the primary means for determining SSF ASW pump flow is by using the more recently installed flow instrumentation, it was considered appropriate to replace the discharge pressure instrumentation SLC requirements with the flow instrumentation SLC requirements.

Likewise, on June 29, 1999, Station management approved revision to SLC 16.11.10 to be implemented on June 30, 1999. This revision to SLC 16.11.10 changes the submittal due date for the Annual Radiological Environmental Operating Report from May 1, 1999 to May 15, 1999. The SLC change makes the submittal due date for the report the same as the Technical Specification requirement.

Please revise your SLC manual according to the instructions below.
