

UNITED STATES
NUCLEAR REGULATORY COMMISSION

WASHINGTON, D.C. 20555-0001

September 2, 1997

Mr. William R. McCollum
Vice President, Oconee Site
Duke Power Company
P. O. Box 1439
Seneca, South Carolina 29679

SUBJECT: COMPLETION OF LICENSING ACTION FOR GENERIC LETTER 96-01,
"TESTING OF SAFETY-RELATED LOGIC CIRCUITS," DATED JANUARY 10,
1996; OCONEE NUCLEAR STATION, UNITS 1, 2, AND 3 (TAC NOS. M94705,
M94706, AND M94707)

Dear Mr. McCollum:

On January 10, 1996, the U.S. Nuclear Regulatory Commission (NRC) issued Generic Letter (GL) 96-01, "Testing of Safety-Related Logic Circuits," to all holders of operating licenses or construction permits. The NRC issued GL 96-01 for three principal reasons:

1. Notify addressees about problems with testing of safety-related logic circuits;
2. Request that all addressees implement the actions described within the generic letter; and
3. Require that all addressees submit to the NRC a written response regarding implementation of the requested actions.

In GL 96-01, the NRC staff specifically requested that licensees take the following actions:

1. Compare electrical schematics and logic diagrams for the reactor protection system, emergency diesel generator load shedding and sequencing, and actuation logic for the engineered safety feature systems against plant surveillance test procedures to ensure that all portions of the logic circuitry, including the parallel logic, interlocks, bypasses, and inhibit circuits, are adequately covered in the surveillance procedures to fulfill the technical specification requirements. This review should also include relay contacts, control switches, and other relevant electrical components within these systems, utilized in the logic circuits performing a safety function; and
2. Modify the surveillance procedures as necessary for complete testing to comply with the technical specifications. Additionally, the licensee may request an amendment to the technical specifications if relief from certain testing requirements can be justified.

NRC FILE CENTER COPY

September 2, 1997

1. A written response indicating whether or not the licensee would implement the actions requested above or propose an alternative action;
2. A schedule for completing the requested actions or proposed alternative; and
3. A response confirming completion of the requested actions.

In response to GL 96-01, you provided letters dated April 17, 1996, and August 19, 1997, for the Oconee Nuclear Station, Units 1, 2, and 3. These submittals provided both the information requested and the responses required by GL 96-01; therefore, TAC Nos. M94705, M94706, and M94707 are closed.

Sincerely,

ORIGINAL SIGNED BY:

David E. LaBarge, Senior Project Manager

Mr. W. R. McCollum

- 2 -

Furthermore, the NRC staff required that addressees prepare and submit the following:

1. A written response indicating whether or not the licensee would implement the actions requested above or propose an alternative action;
2. A schedule for completing the requested actions or proposed alternative; and
3. A response confirming completion of the requested actions.

In response to GL 96-01, you provided letters dated April 17, 1996, and August 19, 1997, for the Oconee Nuclear Station, Units 1, 2, and 3. These submittals provided both the information requested and the responses required by GL 96-01; therefore, TAC Nos. M94705, M94706, and M94707 are closed.

Sincerely,

David E. LaBarge, Senior Project Manager
