April 1, 2015

Thank you for your continued support of refining the proposed 10cfr50.46c (46c) Rule.

Our Industry comments were very effective in changing the scope of the proposed 46c Rule. Many added items were removed and the NRC proposed implementation schedule will be replaced by a single date of required 46c compliance. In order to accurately determine that end date, the Industry has been requested to create an implementation schedule based upon the Rule language that we expect to prevail through the Commissioners authorization next year.

The attached LOCA/ECCS Compliance Schedule Survey (Survey) will gather the input from all the plants and lead to the Industry's recommended compliance end date for the Rule. To make this effort possible, responding industry representatives need to submit the requested, non-binding information about each plant in their fleet. Please be as detailed as reasonable, since we need to provide compelling reasons for a date later than the NRC's proposed 60 month date. Given our recommendation, the NRC staff will need to justify this "delta", using the data compiled from our Survey, in identifying a compliance end date for the Rule version going to the Commissioners.

The time available to complete and submit this survey is quite compressed; we need this information as soon as possible but no later than April 15, 2015, because the NRC staff is beginning the near-final Rule language review process in May 2015.

Thanks in advance for your prompt return of your completed Survey. For any questions or problems with the survey please contact Tom Eichenberg, tweichenberg@tva.gov or Gordon Clefton, gac@nei.org.

Sincerely,

A handwritten signature in black ink, appearing to read "Gordon Clefton", is written over a large, stylized, circular scribble.

Gordon Clefton
