Carrollton, TX 75006

SUBJECT: ACCEPTANCE REVIEW FOR DOOSAN HF CONTROLS TOPICAL REPORTS

Dear Mr. Hsu:

By letters dated September 30, 2011, and August 31, 2012, Doosan HF Controls (HFC) submitted for U.S. Nuclear Regulatory Commission (NRC) staff review "Amendment for the Enhanced Equipment of HFC-6000 Safety Evaluation Report" (Agencywide Documents Access and Management System (ADAMS) Accession No. ML11297A041) and "Amendment for Fast Performance Controller Platform of HFC-6000 Safety Evaluation Report" (ADAMS Accession No. ML131420097).

The NRC staff has reviewed your application and concluded that the information delineated in the enclosure to this letter is necessary to enable the NRC staff to make an independent assessment regarding the acceptability of the proposed topical reports (TRs). In order to make the application complete, the NRC staff requests that HFC supplement the application to address the information requested in the enclosure within 30 days of the date of this letter. This will enable the NRC staff to complete its detailed technical review.

If the information responsive to the NRC staff's request is not received by the above date, the application will not be accepted for review, and the NRC staff will cease its review activities for the TRs. If the application is subsequently accepted for review, you will be advised of any further information needed to support the NRC staff's detailed technical review by separate correspondence.

NOTICE: Enclosure 2 transmitted herewith contains Proprietary Information. When separated from Enclosure, this transmittal document is decontrolled.
--

A. Hsu

2

The information requested and associated time frame in this letter were discussed with Mr. Ivan Chow of HFC on April 20, 2015.

If you have any questions, please contact Joseph Holonich at (301) 415-7297 or Joseph.Holonich@nrc.gov.

Sincerely,

/RA/

Joseph J. Holonich, Senior Project Manager
Licensing Processes Branch
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation

Project No. 731
