Category: This is a Category 1 meeting. The public is invited to observe this meeting and will have one or more opportunities to communicate with the NRC after the business portion of the meeting but before the meeting is adjourned.

Purpose: Texas A&M University (TAMU) has requested this meeting to discuss the schedule and required licensing actions associated with relocation of the Aerojet General Nuclear (AGN) reactor from its current location to another facility within the TAMU system. The current plan is to remove the AGN from its current location in the Zachry building as expeditiously as possible, which may result in temporary storage of the reactor fuel and the reactor itself at another location until the final location is prepared to receive the AGN reactor.
