

Directions: (Refer to TR-AA-230-1004 SAT Implementation)

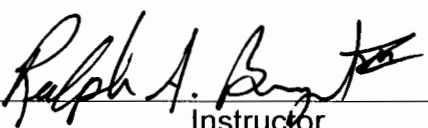

Complete this analysis for each question missed by $\geq 40\%$ of the students.

Evaluation Title/Number:	2015 LOIT NRC exam
Date the examination was administered:	3/31/15
Number of questions on the examination:	100
Number of questions that were missed by $\geq 30\%$ of the students:	5
Number of students evaluated:	9
Number of students who failed the exam:	0
Percent of students who failed the examination:	0

Complete page 2 of this form.

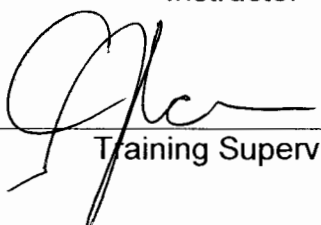

Indicate AR number(s) generated as a result of this analysis (or indicate "NONE"):

Review Conclusions: Review the question for each of the areas identified in A through H and check a "Y" for "Yes" or "N" for "No" to determine if there is a discrepancy with the question. *For any 'NO' response(s) to A-H, initiate a corrective action if needed to define the issues and document the corrective action number on the front page. Attach this form electronically to the corrective action (if written) and file the paper copy with the exam key. One corrective action may be used to document multiple issues.*

- A. Does the test question tie directly to the learning objective(s)?
- B. Is the test question at the same cognitive level as the tested objective(s)?
- C. Does the lesson plan/ instructor guide provide information to support the objective(s)?
- D. Is the training material content correct regarding the exam answer (that is, does the material support the answer or does it lead to an incorrect answer)?
- E. Is there ONLY one correct answer provided on the exam?
- F. Does the exam answer key indicate the correct answer?
- G. Does the test question meet the guidance in TR-AA-230-1002 SAT Design Phase?
- H. Is this an acceptable test question per response of A-G (i.e. all 'YES' responses)?

Verify response to column H is 'YES' if no corrective action is indicated.

2015 Written Exam questions and responses.

Question #	Student	
5		Question: What does pressure boundary mean? Reply: Means pressure boundary of #2 seal.
8		Question: Does this question assume this is how we operate now? Reply: Yes.
14		Question: Should I assume normal controller alignment? Reply: Yes
16		Question: Answer A and C would both require the reactor to be tripped. A would be faster. Should we answer based on no operator action? Reply: I cannot give you any information.
23		Question: Should IR level be in amps? Reply: Correct as written.
46		Question: What is the meaning of "current"? Reply: Means all bulleted items has occurred and time is now.
44		Question: Should I assume its the controlling channel? Reply: Yes
45		Question: "5" Hg back pressure" is it absolute? Reply: Called NRC, Chris Lally. Decided to add A the Hg. (hgA) to indicate it is absolute. Made change to master exam. Wrote on white board and called attention to entire class.
97		Question: Did rest of surveillance get completed. Cycling of PORV is part of RC-OT004. (Note, this is incorrect and was not told to student.) Reply: Called NRC, Chris Lally. Decided to tel student that they have all information required.
71		Question: Is the time, 15 minutes, the time taken to install and remove the shielding? Reply: Answer question as written.
44		Question: What does initially mean? Reply: Right then.
85		Question: How can you answer question without P fig 2 Reply: You have all the information you need.
87		Question: Were you successful in E-2? Reply: If it were unsuccessful it would be specified.
71		Question: Is this after 6 or 12 seconds? Reply: Answer what's going to happen?

King of Prussia, PA 19406-2713

Seabrook Station
Submittal of Information for Operator Licensing Examinations

In a letter dated October 1, 2014, NextEra Energy Seabrook, LLC was requested to furnish documentation to support the administration of Senior Reactor Operator and Reactor Operator licensing examinations scheduled for the week of March 23, 2015. The letter requested examination outlines be provided by January 8, 2015 with the written examinations, operating tests, and supporting reference materials identified in Attachment 3 of ES-201, "Initial Licensing Examination Process; Examination Security," to be furnished by February 6, 2015.

Per your request, NextEra Energy Seabrook, LLC encloses the examination outlines as follows:

ES-201-2, Examination Outline Quality Checklist
ES-201-3, Examination Security Agreement
ES-301-1, Administrative Topics
ES-301-2, Control Room/In-Plant Systems Outline
ES-301-5, Transient and Event Checklist
ES-D-1s, Scenario Outlines
ES-401-2, PWR Examination Outline
ES-401-3, Generic Knowledge and Abilities Outline
ES-401-4, Record of Rejected K/As
Outline of Sampling Methodology and K/A Suppression Report

The information provided in the enclosure is confidential in nature and is not for release to the public

Should you have any questions regarding this matter, please contact Mr. Ed Pigott, Operations Training Supervisor, at (603) 773-7192.

Sincerely,

NextEra Energy Seabrook, LLC
