Control Number 586034

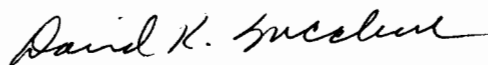

Dear Mr. Seeley,

In response to your letter of 3//23/2015 and phone conversation of 4/8/2015, we have the following response.

1. The original amendment request sent 1/27/2015 by Mr. Berkley, our Radiation Safety Officer, has been reviewed by management and concurs with the statements and representations contained therein.
2. We are requesting that Dr. Guan not be added to the license for Cesium -137 calibrator for survey meters. We are instead requesting that our Radiation Safety Officer, Mr. Daniel Berkley, be added to the license for the Cesium-137 calibrator for survey meter checks. Mr. Berkley was trained at Mercy Hospital in Pittsburgh, PA under Mr. Robert P. Specht (currently on PA-0286 license) from September 1976 to January 1980 on a Cesium-137 survey meter calibrator. He then used the current Cesium-137 calibrator here at Camden Clark from February 1980 to March 1983.

Please do not hesitate to contact our Radiation Safety Officer if you have any questions regarding this request at (724) 454 2371.

Sincerely,

David K. McClure, FACHE  
President & CEO
