Name: Meagan Hull

General Comment

I live and work full-time in the Florida Keys. The irony of this controversial nuclear initiative is that we live in 'The Sunshine State.' We are being out-flanked by many other nations in sustainable energy production. This is wrong and is not permissible in a civilized world. Choose wisely and don't make us shut you down. Switch to solar and your company will have a future in our fast-growing green economy. Otherwise, Turkey Point, you will be left behind. No more Fukushima's. Thank you for listening to logic and reason.
