## General Comment

I see no benefit to the expansion of the existing Turkey Point plant for the health of South Florida's Biscayne National park and for my family's health. I question the thinking behind this without much thought or regard for the location it is in.

This goes far beyond the discussion of whether nuclear power is the right or wrong choice at this point in time, said Matthew Schwartz, executive director at South Florida Wildlands Association. Biodiversity in the ecosystem surrounding the existing Turkey Point plant is second to none. This is absolutely the wrong location for a massive new engineering project of this scale.

Please reconsider this project. Not in my backyard.
