General Comment

Sirs: You have obviously lost your mind(s). Putting nukes on Biscayne Bay has got to be one of the most senseless actions you could take. Are you paying no attention at all to what government scientists are saying about sea level rise? Are you planning to put these nukes on the equivalent of an offshore oil rig? Aside from the absolutely unacceptable, (and I would say immoral) risks to human and natural ecosystem health, nuclear plants are not competitive with alternate forms of energy, including renewable ones.

Please scratch this idea once and for all.
Sincerely, Bill Thomas, Cedar Mountain, NC
