Subject: BROWNS FERRY NUCLEAR PLANT, UNIT 2 - ISSUANCE OF AN AMENDMENT REVISION TO PRESSURE AND TEMPERATURE LIMIT CURVES

Mr. Saba,

I have no comments regarding the BFNP amendment.

Dear Mr. Walker,

I sent you the following email on April 30, 2015. However, I just noticed that I had Unit 1 instead of Unit 2 in the subject of this email. I apologize for this typographical error.

Also, I'll appreciate if you respond to me by tomorrow.

Regards,

Farideh

Subject: BROWNS FERRY NUCLEAR PLANT, UNIT 1 - ISSUANCE OF AN AMENDMENT REVISION TO PRESSURE AND TEMPERATURE LIMIT CURVES
Importance: High

Dear Mr. Walter,

The U.S. Nuclear Regulatory Commission (NRC) is about to issue to issuing an amendment to the Brown Ferry Unit 2 license. In accordance with Title 10 of the Code of Federal Regulations, Section 50.91(b), I am notifying you of the proposed issuance of this amendment.

This amendment is in response to the Tennessee Valley Authority's application dated June 19, 2014 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML14175A307), as supplemented by letter dated December 2, 2014 (ADAMS Accession No. ML14336A691). The amendment revises Technical Specification (TS) 3.4.9, "RCS [Reactor Coolant System] Pressure and Temperature (P/T) Limits," page 3.4-26, and Figures 3.4.9-1 through 3.4.9-2. The new P/T limits are based on proprietary topical report NEDC-33178P-A, Revision 1, "GE [General Electric] Hitachi Nuclear Energy Methodology for Development of Reactor Pressure Vessel Pressure-Temperature Curves." NEDO-33178-A, Revision 1, is the non-proprietary version of this NRC-approved topical report (ADAMS Accession No. ML092370487).

Attached is the associated proposed no significant hazards consideration for this amendment request that was published in the Federal Register on February 3, 2015 (80 FR 5819).

Please let us know if you have any comments on behalf of the State of Alabama for the above amendment.

Regards,

Farideh
