General Comment

I strongly oppose the building of any new nuclear reactors in or near Biscayne Bay and oppose the transport of energy across or through the fragile Everglades. Our river of grass which feeds into Florida Bay and supports and entire eco system has been devastated in the past by the effects of phosphorus and fertilizer from the sugar industry and has killed off the grasses in the bay where shrimp spawn. In addition, the aquifers that we depend on for drinking water, would be impacted and a strong hurricane would devastate South Florida.
