General Comment

I am speaking out against the expansion of the Nuclear power plant at Turkey Point. I don't believe it is in South Florida's best interest, nor in the best interest of the world. There are so many methods of renewable energy production that are clean, environmentally friendly, and affordable for our infrastructure. Wasting 90 million gallons of Miami-Dade's treated wastewater for cooling every day is not a good idea. Endangering delicate, one-of-a-kind species is not a good idea.
