**SUBJECT:** Post Accident Monitoring Report on Inoperable Condensate Storage Tank Level Transmitters  
Indian Point Unit Number 2  
Docket No. 50-247  
License No. DPR-26

**Reference:** Entergy letter (NL-14-078), Post Accident Monitoring Report on Inoperable Condensate Storage Tank Level Transmitters, dated June 20, 2014

Dear Sir or Madam:

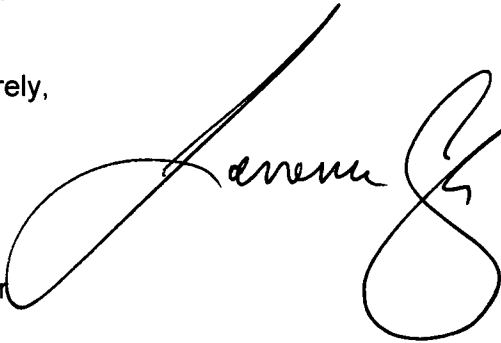

This letter provides an update to a report previously submitted by the referenced letter in accordance with Technical Specification (TS) 5.6.6 (Post Accident Monitoring Report) for two channels of Condensate Storage Tank (CST) Level Transmitters (LT) inoperable for greater than the TS allowed completion time. This updated report corrects an error on the date when CST LT-1128A was returned to operable. The referenced letter stated under the section "Plans and Schedule for Restoring," that on June 16, 2014, LT-1128A was declared operable after refurbishment. During a review of special reports to the On-site Safety Review Committee it was identified that in the referenced letter the date for restoration of LT-1128A to operable was June 11, 2014, and not June 16, 2014. This error was entered into the Entergy corrective action process as CR-IP2-2015-00862.

ADD  
NRR

Entergy is making no commitments in this letter. Should you have any questions regarding this matter, please contact Mr. Robert Walpole, Manager, Regulatory Assurance, Indian Point Energy Center at (914) 254-6710.

Sincerely,

LC/cbr

A handwritten signature in black ink, appearing to read "Robert Walpole". The signature is written in a cursive style with a large, sweeping initial "R" and a large, circular flourish at the end.
