Subject: Nuclear Regulatory Commission Environmental Assessment for Turkey Point Nuclear Power Plant Ultimate Heat Sink Temperature

Hello Ms. Becker,

I work for the U.S. Nuclear Regulatory Commission (NRC), and I am the NRC's project manager for the Turkey Point Nuclear Power Plant, Units 3 and 4. The licensee for this plant is Florida Power & Light Company (FPL). The NRC is preparing an environmental assessment related to a license amendment request we received from FPL on its ultimate heat sink (cooling canals) temperature limit. FPL requested that we expedite our review of its request to prevent the units from having to shut down. We would like to schedule a call with you on Monday, July 28, 2014, to discuss the results of our environmental assessment and to see if you have any concerns or questions.

Please let me know if you would be available. If you are not the appropriate official for this call, please refer me to that official.

Thank you,

Audrey Klett, Project Manager
U.S. Nuclear Regulatory Commission
Office of Nuclear Reactor Regulation
Division of Operating Reactor Licensing
