If you received this communication in error, please notify the sender immediately by telephone and return the original to the above address, by U.S. Mail. Thank You.

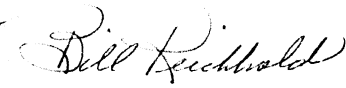

As we discussed by telephone on February 17, 2015, it appears your renewal application addresses items for industrial radiography (references to 10 CFR Part 34) rather than portable gauging devices. The Nuclear Regulatory Commission (NRC) issued Consolidated Guidance about Materials Licenses: Program-Specific Guidance about Portable Gauge Licenses in NUREG-1556, Volume 1, Revision 1, in November 2001, to provide guidance for completing an application for the use of sealed sources in portable gauging devices. NUREG-1556, Volume 1, Revision 1, outlines the necessary information needed to complete your renewal application. Your renewal application did not sufficiently all of the information required by NUREG-1556, Volume 1, Revision 1 and appeared to address items for industrial radiography rather than portable gauging devices.

1. Please resubmit your renewal application using Appendix B, "Suggested Format for Providing Information Requested in Items 5 through 11. See copy enclosed of Appendix B. You may also view a copy of NUREG-1556, Volume 1, Revision 1 at the NRC website at <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v1/r1/>.
2. Also, as we discussed, it appears you only wish to use the Troxler model 3216 portable gauges. As we discussed by telephone, your current license lists a number of Troxler gauges you did not request on your renewal. Namely, Troxler models 3400 series, 4640, 4545, 4300, and 3241 series portable gauges. Please specify what happened to these gauges OR if you never purchased these gauges please state so. Please confirm that you only wish to use the Troxler model 3216 gauges.
3. Please specify the total activity you will need for each radionuclide listed on your license. For example, Americium-241, total activity 88 millicuries.
4. Please specify if you will perform non-routine maintenance on the Troxler Model 3216 gauges, OR commit to having non-routine maintenance performed by Troxler or other companies authorized to perform non-routine maintenance on the Troxler Model 3216 gauges. If you plan to perform non-routine maintenance on the Troxler gauges you will need to submit additional information (see Appendix G in NUREG-1556, Volume 1, Revision 1).

Please send a facsimile (630- 515-1078) of your response to the above within 14 days and state, Response to Control 585828. Please include a cover letter on company letterhead, dated and signed (signed by an individual who is authorized to sign official documents on behalf of the licensee) with your response letter. Please call me at 630-829-9839 if you have any questions.

*In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this facsimile and the attached documents will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). The NRC's document system is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).*
