RE: License No. 34-26553-0

Dear Ms. Sara Forster,

This letter is to ensure the clarification to the License No. 34-26553-02. We have thoroughly gone through our records containing Nuclear Materials and to the best of my knowledge, have found that we do not possess any of the following:

- We do not have in our possession and/or have use any devices that contain californium—252 and/or cadmium-190.
- Troxler model 3411-B portable gauging device has never been in possession or has been used under NRC License No. 34-26533-02.
- Model 4640 portable gauging device has been transferred to 7NT Engineering, LLC, Ohio License No. 31210580014 and is no longer in possession of Barr Engineering, Inc.

If you should need additional information containing the above or, if you should have any questions or concerns, please feel free to contact me.

Best Regards,

Michael Ohanian
Radiation Safety Officer

Forster, Sara

Good morning Sara,

Above you will find a letter regarding the additional clarification that you have requested regards to License No. 34-26553-02. Please let me know if you should need anything else in addition to the above, or if there are any questions/concerns.

If you should need an original hard copy for your files please let me know and I would be glad to send one out for you.

Thank you for all your help with getting our license updated!

I hope you have a wonderful day!

Heather Schmidt

Subject: RE: Additional Information Request for Barr Engineering, Inc., NRC Lic. No. 34-26553-02

Hi Mr. Ohanian:

I apologize for the delay in responding to you. We have reviewed the materials submitted, and need one additional clarification from you concerning the removal of the californium-252 and cadmium-109 authorizations currently listed on NRC License No. 24-26553-02. **Could you please submit a signed and dated letter confirming that no devices containing californium-252 and/or cadmium-109 have ever been used or possessed under the license?** In the letter, please also confirm that no Troxler Model 3411-B portable

gauging devices have been used or possessed under NRC License No. 24-26553-02 and that the only Model 4640 portable gauging device ever possessed under NRC License No. 34-26553-02 has been transferred to 7NT Engineering, LLC, Ohio License No. 31210580014, as indicated in your amendment request.

I will call you on Monday to touch base regarding this request. Thank you!

Sincerely,
Sara Forster

Importance: High

Sara,
I sent this information to you back on 3/16/15, and I have not heard anything back from you?
I hope all is well and I wanted to follow up because I was hoping that we could have this all wrapped up and we could get our updated license?
Please let me know where we stand with this?

Again thank you for all of your help in this matter. If I need to call and talk to you, Please let me know.

Mike

Sara,
I just sent the Training information but I want to follow up with all of the documentation that we discussed so that we are dealing with the latest updated information.
I think with this information, you should have everything you need?
Please let me know if there is anything that I forgot to add.

Thanks again for all of your help!

Mike
