General Comment

I live in Miami in an area called The Roads. We will be directly impacted by the FPL high voltage lines. I've lived in this area for over 30 years. I have 2 young kids. As a parent I'm trying to teach my kids about the importance of recycling and respecting our environment. I am sad, disappointed and scared that FPL was able to get this far in the process. When are we, as adults, going to start practicing what we preach to our kids? When are we going to start putting what's right in front of what's financially more lucrative? FPL could invest more in solar energy if it really wanted to, but it's not as lucrative. So what do they suggest instead- let's do more environmental harm to south Florida & the Everglades, because Tallahassee says we can. Miami-Dade, Coral Gables & Pinecrest governments all disapprove of this, the residents disapprove of this, and somehow that doesn't matter. None of this makes any sense. I hope and pray that you will do what's right. That you will object to this and show FPL and Tallahassee that money doesn't trump safety. Thank you.
