**Docket:** NRC-2009-0337

Notice of Receipt and Availability of Application for a Combined License

RECEIVED

**Comment On:** NRC-2009-0337-0020

Combined License Application for Turkey Point Nuclear Plant, Unit Nos. 6 and 7; Draft Environmental Impact Statement

**Document:** NRC-2009-0337-DRAFT-0084

Comment on FR Doc # 2015-05099

## Submitter Information

3/5/2015  
80 FR 12043

**Name:** Nancy Lee

**Address:**

20448 NE 34th Court  
aventura, FL, 33180

## General Comment

74

Do not License this application, no way, no how. We are having salt water intrusion into the everglades. Salt Water plants are growing there. If there, then everywhere. The tide is rising. We don't want two more nuclear power plants built on fill. The salinity in the cooling canals is too much and the canals are too hot. You are using our precious water to cool the canals more. Israel uses all of its reuse water. In the future we will have to use all of ours as well. If you legislate the water for this plant we won't have it to use for our precious tropical plant agriculture. Did you know that in the continental US florida is the only place where tropical plants grow. I know I am not supposed to address this but god guys, how are you going to get people in the keys evacuated. There is only one way to go past the plant. There are almost 4 million people in a 50 mile radius. I have yet to hear the evacuation plan. And I have been reading about Japan. They are finding radiation pretty far from the plants. FPL does not take solar power seriously. I would like panels on my house. I am sure lots of others would too.

Until you talk to Harold Wanless Geologist about rising sea water this is really a stupid idea. I just don't think you are thinking straight. I remember 3 mile island. Learn from your mistakes. You are putting entirely too many plants in one place. What do you think we are Japan? I would like you to meet with University of Miami Professor Harold Wanless. I would like you to not allocate anymore water to the plant. I don't have a working Thyroid. A lot of good iodide will do me. Although I would like to try the cherry flavored syrup to see how it tastes (if kids will actually drink it).

You should not require regular people to read technical 25 megabyte files that take so long to load and are 717 pages long. You could have made this much shorter. Let's make it easy for you: No Water, Sea Level Rise, Stupid Idea, Old Technology, Too Much Salinity, Too many people. JAPAN.
