Dear Ms. Bladey;

This note is to inform you of my opposition to the construction of the Two New Nuclear Power Reactors- 6 & 7- at Florida Power and Light's Turkey Point facility.

History has shown that the potential exists for unplanned "incidents" to occur at or within Nuclear Power Plants.

Fukushima, Three Mile Island and Chernobyl are just 3 examples of when the best intentions can go terribly wrong. The results of such an unplanned "incident" can be catastrophic and long lasting.

Given the proximity of Turkey Point to the major population centers of South Florida , its location close to the environmentally sensitive, irreplaceable, Florida Everglades, Everglades National Park and Biscayne National Park, the Turkey Point Nuclear Power Plant exposes the population and environment of South Florida to unintended, but nevertheless, extraordinary risk.

Given the advent of viable, lower cost, and benign alternative power generating technologies such as wind and solar, the risks associated with the expansion of Nuclear Power in South Florida far outweigh any possible benefits that may be derived.

As the world moves toward ecologically sound and renewable alternative power technologies , I believe it is contingent upon FP&L to do likewise. FP&L should not resist change, but embrace it. It is in the interests of FP&L's shareholders, customers and a healthier, safer world to do so.

I urge the NRC, and FP&L, to reconsider this ill conceived plan.

Thanks,

Francesca Violich
