Cindy Bladey,  
Office of Administration  
Mail Stop: OWFN 12 H8  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-000

Good morning Ms. Bladey:

Please be advised by this e-mail that I am ***strongly*** opposed to the construction of the two proposed Nuclear Power Reactors, 6 & 7 at Florida Power and Light's Turkey Point facility.

History has demonstrated that a very real potential exists for unanticipated "incidents" to occur at or within Nuclear Power facilities. Fukushima, Three Mile Island and Chernobyl are just three examples of how the very best intentions can go terribly wrong. The results of these actual unanticipated "incidents" have proven both catastrophic and long-lasting.

I live approximately 7 miles from Turkey Point...and I have for years wondered what I would do in the event of a "melt down". Unfortunately, given my proximity, there really is nothing I CAN do. In addition, Turkey Point's location immediately contiguous to the environmentally sensitive, fragile and irreplaceable, Florida Everglades, Everglades National Park, Biscayne National Park, and the Florida Keys Marine Sanctuary, Turkey Point exposes the population and natural environment of South Florida to potentially extraordinary risk.

When Turkey Point was originally developed in the early 1970s, the conditions that existed then are NOT the same as they are today. Those original conditions have changed dramatically in the ensuing years, making Turkey Point a totally unsuitable location for continued operation, much less expansion.

Locating a new facility in close proximity to a densely populated metropolitan area, contiguous to natural resources, within a historically proven High Velocity (Wind)-Hurricane Zone, and defenseless against terrorism threats by not only water but air, seems at best to be an ill-conceived plan.

With the advent of viable, lower cost, and benign alternative power generating technologies such as wind and solar, the risks associated with the expansion of Turkey Point far outweigh any possible benefits.

I urge the NRC, and Florida Power and Light to abandon any consideration of expansion at Turkey Point.

Sincerely,

**Christian J. Johannsen, CCIM**
