Subject: Nuclear power plants and poles in Miami-Dade County FL

I am very much against the expansion of 2 additional nuclear power plants as part of the Turkey Point FPL power system. I am also against the 80 ft tall power poles planned for going along US1 in Miami-Dade County. The risks to the area by having such additional power plants from rising sea levels and the probability of a risk from more power plants are unacceptable. The Greater Miami area is one of the few economic power houses in this part of Florida and it would come to a complete standstill if there were a mishap. Plus putting such large ugly power poles along a roadway which goes thru many residential and low rise commercial establishments and neighborhoods of high end homes are unacceptable choices. Just because you can build it does not mean it should be built. The human needs and emotional needs are great in this area, and we should all be very cautious when locating such extreme projects in this Miami area.

Please do not license these 2 additional power plants and do not allow the huge power poles to be located along US 1.
Sincerely yours Gary P Simon
