Subject: No to FPL's plan to expand nuclear power at Turkey Point

FPL's expansion would consume additional large quantities of fresh water which is already in short supply. It would spend billions of dollars that could be better spent on power conservation and alternative energy projects. Its design does not take into consideration the reality of climate change; in fact it puts Florida's power grid at risk. This expansion plan is poorly conceived, inadequately designed, and environmentally harmful.

As a resident of Miami-Dade County, Florida, I urge you NOT to approve two new nuclear reactors at Turkey Point.

Thank you.

Turner Cathey
